

Search::localSearch

```
graph LR; A[Search::localSearch] --> B[optJrParameters::get_numberOfThreads]
```

A diagram showing a call from the `Search::localSearch` method to the `optJrParameters::get_numberOfThreads` method. The `Search::localSearch` box is shaded gray, and the `optJrParameters::get_numberOfThreads` box is white. A blue arrow points from the left box to the right box.

optJrParameters::get
_numberOfThreads
